- ^{s/ r}Liver problems or damage
 - Abdomen, Liver, complaints

So the Genus Epidemicus is Gelsemium sempervivens, from first to last.

- Not Camphora, because Gelsemium is just as cold and devitalized as Camphora.
- Not Aconitum, because the prodrome is not sudden, but unseen and slow. Yes the headache and suffocation is sudden, but that is Gelsemium.
- Not Rumex for the dry tickling cough, but Gelsemium for the dry tickling cough.
- Not Antimonium tartaricum for the wet cough, but Gelsemium for the wet cough.
- Not Stannum for the weakness in the chest and too tired to talk, but Gelsemium.
- Not Arsenicum album for the chills and fever and debilitation, but Gelsemium.
- Not Veratrum album for the chills and vomiting, but Gelsemium.
- Not Eupatorium perfoliatum for the chills and bone aches, but Gelsemium.
- Not Adamas, not Justica, not Sanguinaria, not Bryonia, not Sticta, not Rhus toxicodendron, not Lobelia.....

Yes I am saying that you have given a similar and it has acted in a positive way. Now I challenge you to go back to those people and give them the simillimum and see how much better they feel.
